Reply to Office Action

Application number: 09/514,031;
Examiner: George A. Bugg;
Art Unit: 2636;
Filing date: August 27th, 1998;
Title of Invention: Devices for three-dimensional imaging and recording.

July 20th 2005.

Dear Mr. Bugg,

In reference to my patent application 09/514,031 my instructions are to delete all the matter added in my replay to the previous office action in this case, including alterations to the specification and drawings. This is enclosed with double brackets around the material to be deleted. The Pro Se guide you sent me did not explain how to delete drawings from a specification. I have placed all the image numbers in double brackets to indicate these drawings should be deleted from the application. Also I have struck though the image numbers in the header and footnote of each drawing page.

My apologies for inserting this material, but I was given some wrong advice on this.

The old claims have been cancelled and new ones written. They are double spaced as requested. Also the number of Markush claims has been greatly reduced making it easier to follow. The use of the words comprising and consisting in a preamble has also been removed.

Since the claims are now different from copending application 10/959,471 I believe this removes the provisional double patenting rejection.

Regards,
Greg Orme.
